## Capabilities Statement

---

Kiniconsult, Inc. incorporated in 2015 in Miami, specializes in the development of digital health offerings, modular/emergency hospitals, and next generation telehealth. Kiniconsult enables seniors to “age in place” and provides support for “hospital at home” models of care.

Kiniconsult, Inc. can evaluate project scope, provide an executable business plan, and provide management oversight of telehealth, emergency/modular hospitals, and at-home models of care. We provide quality and analytic data to continually improve. In addition, we provide remote telehealth for seniors and sensors to monitor these populations at home. Data alerts, as needed, are sent to the relevant persons to act on them.

## Core Competencies

---

- Digital Health
- Telemedicine
- Modular Hospitals
- Sensors for Home Use
- Continuous Monitoring
- Disaster Management

## Differentiators

---

Deep operational and clinical experience along with a proven innovation mindset that allows for cost-effective build out of next-generation healthcare facilities. In addition, it will evaluate next-generation technologies and make recommendations on cost and effectiveness. Global supply chain vendor identification and management.
